CORL Communications Inc.

At Corl Communications, our structured cabling solutions are designed and installed to meet the individual needs of our customers. Our forward-thinking approach allows us to deliver exactly what the customer needs. Our management team has over 50 years of combined experience in designing and installing structured cabling systems for voice, data, and video. Corl Communications services a wide variety of clients. Some examples of our client base are, but not limited to, manufacturing, healthcare, federal, state and local government, universities and educational facilities. Whether it's two cables for a small office, or a multi-campus LAN/WAN infrastructure, we are here to meet your needs.

Corl Communications is a corporate BICSI member. We currently have two RCDD, (Registered Communications Distribution Designers), on staff and a team of BICSI certified technicians to get the job done right the first time. For further information about BICSI, visit www.bicsi.org

Our capabilities include:

• Category-6, and 6A twisted-pair structured cabling solutions installation and design
• Fiber optic cabling, connector terminations and fusion splicing
• Aerial and underground outside plant cabling capabilities
